

Unity – Simple Animations

Mr. Neat

Recipe to make a simple Animation

- Make a sprite sheet
- These are individual images, stored as png's, with no background
- Like a flip-o-rama

Sprite Sheet Generation

- 1) make independent images
- 2) store each as png file
- 3) insert pictures back into ppt
- 4) store slide as png

Sprite Sheet : remove background

- 1) use website lunapic.com
 - 2) select edit
 - 3) select transparent
 - 4) Load picture
 - 5) click on your image background
 - 6) click apply threshold
 - 7) save file (gif)
- (background is gone!)

Sprite Sheet – load into Unity

- Import new asset (gif,png)
- Change inspector sprite mode to “multiple”
- Press apply
- Open inspector sprite editor
- Click slice, slice, apply
- Load sprite sheet asset into scene (not hierarchy)
- Press play
